

13/08/25

① Write a program to print distinct vowels of the string without using set.

```
S = "RaMA rAO"
```

```
S = s.upper()
```

```
Vowels = "AEIOU"
```

```
result = ""
```

```
for ch in s:
```

```
    if ch in vowels and ch not in result:
```

```
        result += ch
```

```
print(result)
```
